

My name is Kyaw Myo Aung. I have graduated from University of Technology (Yatanapon Cybercity) of Bachelor of Engineering(BE.IST). I am learning Japanese Language and I will answer JLPT(N3) exam in 05/07/2026. Now, I am working in Myanmar DCR and my team leader is Ma May Thitsa Oo and manager is Ma Thazin Mon. My hometown is Wundwin, Mandalay Region.

I am a passionate Software Developer dedicated to building efficient, user-centric web applications using modern technologies. I thrive on solving complex problems with clean, scalable code and am constantly exploring new ways to enhance the user experience through technology.

Modern Web Development: Expert in building fast, responsive, and robust user interfaces with **Next.js** and **React**.

Backend & Data Integration: Proficient in leveraging **Supabase** for real-time database management and secure authentication systems.

AI Integration: Skilled in integrating **Google Gemini AI API** to create intelligent, feature-rich applications.

RAG & Vector Search: Experienced in implementing **Vector Embedding** techniques to build advanced search and retrieval systems that deliver precise information.

Philosophy I believe that technology should exist to simplify lives. Therefore, I prioritize writing clean, maintainable, and scalable code, ensuring that every solution I build provides tangible value to the end user.

Vision My current focus is at the intersection of AI and Web Development, where I aim to build products that address the future needs of the digital landscape. I am an avid learner, constantly keeping pace with emerging technologies, and I aspire to contribute meaningfully to the tech community through innovation and collaboration.
